

STAGE 3 WATERING RESTRICTIONS IMPLEMENTED

NCID is moving to Stage 3 watering restrictions. Stage 3 restrictions are intended to encourage residents to further reduce water in order to avoid a comprehensive watering ban. Stage 3 maintains the same watering guidelines as Stage 2 but gives residents flexibility on how to reduce their water usage. Some ways to do this are:

- ❖ Reduce lawn irrigation by decreasing the run times, cutting back on the number of water days, and refraining from sprinkling certain areas.
- ❖ Avoid washing vehicles or boats
- ❖ Sweep driveways, sidewalks, etc. rather than power washing
